1 Problem

(Linear Forms - Q2.26)
Find the equation of a plane with intercept 3 on the y-axis and parallel to ZOX plane.

2 Solution

Since plane cuts an intercept of 3 units on y-axis, point $\mathbf{C} = \begin{pmatrix} 0 \\ 3 \\ 0 \end{pmatrix}$ lies on the plane.
Also, as the plane is parallel to the ZOX plane, both must have same normal vector. So,

$$\mathbf{n} = \mathbf{n}_{ZOX} = \begin{pmatrix} 0 \\ 1 \\ 0 \end{pmatrix} \tag{2.0.1}$$

If $\mathbf{P}$ is a general point on the plane, then the equation of plane is given by

$$\mathbf{n}^\top(\mathbf{P} - \mathbf{C}) = 0 \tag{2.0.2}$$

$$\implies \mathbf{n}^\top\mathbf{P} = \mathbf{n}^\top\mathbf{C} \tag{2.0.3}$$

$$\implies \begin{pmatrix} 0 & 1 & 0 \end{pmatrix}\mathbf{P} = \begin{pmatrix} 0 & 1 & 0 \end{pmatrix}\begin{pmatrix} 0 \\ 3 \\ 0 \end{pmatrix} \tag{2.0.4}$$

$$\implies \begin{pmatrix} 0 & 1 & 0 \end{pmatrix}\mathbf{P} = 3 \tag{2.0.5}$$
